After successfully completing nine hours in the MAIS program with at least a 3.0 average, the student may appeal to the Program Director for full admission to the MAIS.

Program Features

The curriculum for the program consists of two components, the 27-hour MAIS core curriculum and a 12-hour professional component approved by the program director. The delivery system for the MAIS core is non-traditional and based on a modified co-

hort model. A group of up to 30 students will pursue each of the nine MAIS courses together. The cohort will be divided into study groups of eight to ten students. Prior to the beginning of the semester, students will receive a reading list and assignments for the first course session. Instruction will begin with an intensive three to five-day class meeting with the professor early in the semester. For the second segment of the course, students will meet with their study group on a weekly basis for discussion of research and project development. An MAIS program representative may facilitate these meetings, as the instructor deems necessary. Throughout this period, the instructor may also interact with students through on-line activities or discussions. Finally, the cohort will meet for a second intensive three to five-day class meeting to complete the course.
