Mission Statement
Intercultural engagement—including community development, humanitarian outreach, and integrative research skills—is essential for a globalized world and increasingly important to our student population. Intercultural Studies at Union—integrative, academically rigorous, missional—provides its students with an interdisciplinary approach to current theory and research relevant to intercultural engagement. By optimizing the impact that our students and our community members have here and around the globe, Intercultural Studies bolsters Union’s broader mission of providing Christ-centered education that promotes excellence and character development in service to Church and society.

Curriculum
Union offers two programs in Intercultural Studies, a comprehensive major that does not require a minor, and the minor for students majoring in another area. Both programs are designed to enable students to develop theoretical and practical knowledge needed to live and work effectively in culturally complex environments. The University also offers the minor in Humanitarian Studies, which is designed to prepare students to apply content in their majors in a multicultural setting, with particular attention to meeting needs in culturally diverse communities at home and around the world.

The Center for Intercultural Engagement in partnership with the Center for Excellence in Health Care Practice offers two certificate programs in International Health Care. The purpose of the program is to enhance the knowledge and clinical skills of domestic and/or international nurses and to promote intercultural awareness. The two-semester program offers curriculum that incorporates didactic instruction, clinical laboratory and simulation experiences, and anatomical instruction in the cadaver lab. The program prepares the international nurse for additional licensure and certification for service in domestic and/or international environments. The intercultural studies component of the program presents foundational concepts of intercultural communication and promotes the development of intercultural competence, especially in health care settings.

The program is available on the undergraduate level awarding the Certificate in International Health Care as described below. The program is also available as a post-baccalaureate Certificate in International Health Care as described in the Graduate Catalogue.
