BROW LASHES SALON SITE

By Mohammad Abuhantash

ABOUT THE CLIENT

Brow Lashes by Rima is a local eyebrow threading and beauty salon business here in Jackson. They do not currently have much online presence other than a Facebook page. My task for senior seminar was to create an intuitive website for the business that I will showcase here.

CLIENT REQUESTS/TASKS

Appointment Scheduling

- The client/owner wanted a way for prospective clients to be able to schedule appointments on the website.

CLIENT REQUESTS/TASKS

Email Confirmation

- Whenever an appointment is made through the website, It sends the customer and the business owner an email with details of the appointment.

CLIENT REQUESTS/TASKS

Previous Client Images

- The client also wanted to have a page where prospective customers can go and see images of past customers that have gotten something done by the salon.

CLIENT REQUESTS/TASKS

Services

- The client also wanted to have a page where prospective customers may view the different services offered by the client's business.

6

CLIENT REQUESTS/TASKS

Contact us

- Lastly, the client wanted to have a page where prospective customers can easily see the businesses' contact information and address.
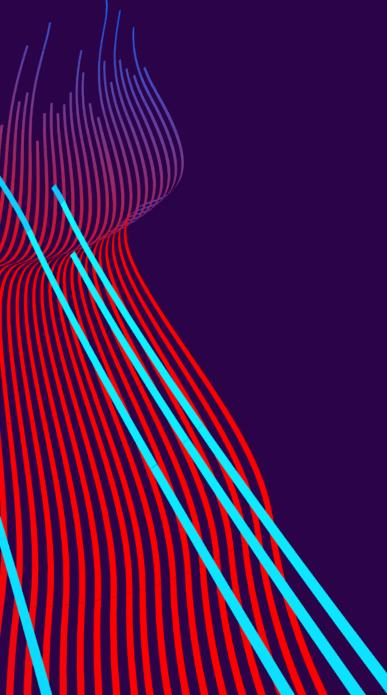

PERSONAL CHALLENGES/TASKS

SQL Database

- I had to create the database for the back-end portion of the website using MySQL where I created an appointments database.

PERSONAL CHALLENGES/TASKS

Server-Side Scripting

- Throughout this project, I had to learn the server-side of web building using Java as a server-side scripting language.

9

PERSONAL CHALLENGES/TASKS

JDBC

- Specifically, I used JDBC (Java Database Connectivity) as an application programming interface (API) in order to access the website's database.
